What is the Outreach Enrichment Project?

The purpose of the Outreach Enrichment Project is to educate parents to be active team members of their children’s education by providing training on topics such as learning about the IEP/504 plan or IFSP meetings process, health and wellness, learning about the different disabilities, connect parents to community resources, and with other parents that are on the same journey, emotional support and much more!

If you have a disability that requires an accommodation, please contact us.
